REASONS (list only main points):	
I place2 over1 because:	
2 is longer and deeper bodied, resulting in a more balanced profile. 2 has slightly more natural muscle expression in her lower quarter than 1. 2 has a more correct set to her hind legs.	
I place1 last because:	
1 has the least depth of body. 1 does not have enough set in her hind legs. 1 is narrow-fronted. 1 is tighter in the heartgirth/forerib.	
I do grant 1 has a more desireable foot structure than 2.	
These are my reasons for placing this class of beef heifers 3, 4, 2, 1.
